We Want to Hear from You

Sarpy County south and west of Nebraska Highway 370 and Nebraska Highway 50 is a high growth area. Are there transportation issues? Is a new interchange needed? The Omaha-Council Bluffs Metropolitan Area Planning Agency (MAPA), in coordination with Sarpy County and the Cities of Gretna and Papillion, is developing the Sarpy County ***I-80 Planning Environmental Linkages (PEL) Study*** to uncover answers to these questions and others. You can get involved by watching the video (see the website below) and then commenting online at i80PEL.digicate.com through August 12, 2020. Due to the coronavirus (COVID-19) pandemic, no in-person meetings are scheduled at this time.

Background

The study began this summer and will continue through summer 2021. It will evaluate the need for a new interchange in Sarpy County south and west of Nebraska Highway 370 and Nebraska Highway 50, which is a high-growth area. If a new interchange is needed, the study will explore and evaluate locations for it. The effort will build on the results of previous studies, analyze traffic and land use, develop and evaluate alternatives, and engage the public. Once the study is completed, future work may involve preparing National Environmental Policy Act (NEPA) documents, an Interchange Justification Report (IJR), design, and construction.

For more information about the ***Sarpy County I-80 Interchange PEL Study***, contact Jim Boerner, MAPA Transportation Planner, at 402-444-6866 or jboerner@mapacog.org. You may also visit mapacog.org.
